

Windowing Controls Overview

Built on the top of solid architecture, Intersoft ClientUI delivers truly rich desktop experiences to the Silverlight and WPF platform through comprehensive windowing controls, ranging from multi-purpose window, modal dialog box, message box, window chrome to dock-style task bar and much more.

ClientUI Window Controls are designed with full ISO-standards compliance enabling consistent and reliable user experiences throughout the application. The [UXDesktop](#), [UXWindow](#) and [UXDesktopDock](#) works seamlessly together to deliver rich, commercial-class application interfaces such as launching an application from task bar, drag and drop objects across windows and task bar, and much more.
