

Intersoft.Client.Data.ComponentModel Assembly

Some remarks and description about this assembly.

Classes

AggregateValues	Represents class that store aggregate values from a group collection.
CompositeFilterDescription	
CompositeFilterDescriptionCollection	
CompositeFilterDescriptor	
CompositeFilterDescriptorCollection	
DataListProviderAttribute	Represents the attribute to define the data list provider which will be used for marked property.
DisplayMemberAttribute	Represents the attribute to define the display member for marked property.
DoNotEncodeStringsAttribute	
DoNotObfuscateAttribute	
DoNotObfuscateControlFlowAttribute	
DoNotObfuscateTypeAttribute	
DoNotPruneAttribute	
DoNotPruneTypeAttribute	
DoNotSealTypeAttribute	
EncodeStringsAttribute	
ExcludeFromMemberRefsProxyAttribute	
ExpressionBuilderOptions	Represents options for expression builder.
ExpressionExtensions	Extention methods for Expression classes.
FilterDescription	
FilterDescriptionBase	
FilterDescriptionCollection	
FilterDescriptor	
FilterDescriptorBase	
FilterDescriptorCollection	
FilterMemberAttribute	
FilterMetadataAttribute	
FilterValue	Represent value for data filtering.
HierarchicalCollectionView	
HierarchicalCollectionViewItem	
IEnumerableExtensions	Extension method for IEnumerable class.
IgnoreFilterMemberAttribute	
IgnorePropertyMemberAttribute	Represents the attribute to define a property that will not be displayed in UXPropertyGrid.
ItemChangedEventArgs	Provides data for the ItemChanged event.
ItemChangedEventArgs<T>	Provides data for the ItemChanged event.
ObfuscateControlFlowAttribute	
ObfuscateNamespaceToAttribute	
ObfuscateToAttribute	
ObservableItemCollection<T>	Represent observable collection that listen to item property changed.

PagedCollectionView	Represents a view for grouping, sorting, filtering, and navigating a paged data collection.
PageDescriptor	Represent query descriptor for paging.
PropertyGroupDescription	Represents property group description.
PropertyInfoExtensions	Provides various extensions methods for PropertyInfo
PropertyMemberAttribute	Represents the attribute to define a property that will be displayed in UXPropertyGrid.
PropertyMemberMetadataAttribute	Represents the attribute to define the metadata of a marked class.
PropertyTypeConverterAttribute	Represents the attribute to define a type converter for a marked class or property.
QueryableExtensions	
QueryDescriptor	
QueryDescriptorExtensions	
QueryProviderExtensions	Extention methods for IQueryProvider.
ReportExceptionAttribute	
SortDescriptor	
SortDescriptorBase	
SortDescriptorCollection	Represent collection of sort descriptor.
TypeExtensions	

Interfaces

ICollectionViewGroup	Defines data member for collection view group.
ICompositeFilter	Defines data member for composite filter description.
ICompositeFilterDescription	Defines data member for composite filter descriptions.
ICompositeFilterDescriptor	Defines data member for composite filter descriptor.
IDescription	Defines data member for description object.
IFilter	Define data member for filter description.
IFilterDescription	Defines data member for filter description.
IFilterDescriptor	Defines data member for filter descriptor.
IFilterValue	Defines data members that represent filter descriptor.
INotifyItemChanged	Defines data member for INotifyItemChanged object.
ISort	Defines data member for sort description.

Enumerations

Aggregate	Specifies type of aggregate values.
ExcludeFilterOperator	
FilterCompositionLogicalOperator	Specifies type of logical filter composition operator.
FilterOperator	Specifies type of filter operator.
MemberType	Specifies the constants that determine the member type.
